

Full-Stack Developer

About Us

Livwell Asia is an award-winning wellness insurtech company based in Singapore. We are transforming the wellness and insurance landscape through innovative mobile solutions that enhance the health and well-being of our customers. Join our dynamic team and help us build the future of wellness technology in a collaborative, growth-oriented environment.

Position: Full-Stack Developer

We are seeking a talented and passionate Full-Stack Developer to join our team. In this role, you will be instrumental in designing, developing, and maintaining both the front-end and back-end components of our next-generation web applications, ensuring exceptional user experiences and robust performance.

Key Responsibilities

- Develop and maintain high-quality, scalable web applications, focusing on both front-end and back-end functionalities.
- Design and implement intuitive and responsive user interfaces using Angular or React.js.
- Build and maintain robust server-side logic and APIs using Node.js.
- Design, develop, and manage databases using MongoDB.
- Optimize application performance, responsiveness, and stability across the full stack.
- Conduct thorough code reviews and contribute to upholding coding standards.
- Collaborate with product managers, designers, and other engineers to deliver outstanding user experiences.
- Troubleshoot, debug, and resolve complex technical issues across the application stack.
- Stay updated with the latest web development trends, tools, and best practices, and recommend improvements.
- Ensure code quality through unit and integration testing.

Required Qualifications

- 2 years of professional experience in full-stack web development.
- Proven proficiency in Angular or React.js for front-end development.
- Strong experience with Node.js for building server-side applications.
- Hands-on experience with MongoDB for database design and management.
- Solid understanding of HTML5, CSS3, and modern JavaScript (ES6+).
- Experience integrating RESTful APIs.
- Familiarity with version control systems (preferably Git).
- Experience writing unit and integration tests.
- Excellent problem-solving and communication skills; ability to work independently and as part of a team.

Preferred Qualifications

- Experience with Express.js framework.
- Knowledge of state management libraries (e.g., Redux, NgRx).
- Familiarity with CI/CD pipelines for web applications.
- Experience with cloud platforms (e.g., AWS, Azure, GCP).
- Understanding of microservices architecture.
- Understanding of the insurance or fintech industry is a plus.

What We Offer

- Competitive salary, commensurate with experience.
- Performance-based bonuses and career growth opportunities.
- Collaborative and innovative work environment.
- Flexible working hours with a focus on work-life balance.
- Opportunity to work on cutting-edge technologies in the fintech space.
- Professional development support and training opportunities.
